

Online Professional Development opportunity for IT teachers.

This course introduces computer programming in the C# language. It also covers concepts such as the internals of computers, introduces the history and future of computers and explores how computers are changing society.

Key features:

- » online course using Moodle
- » video lectures
- » flexible learning hours
- » online tutorial sessions
- » online assessment
- » professional development scholarships

The programme offers the flexibility to work at school or in your own time, using free tools such as Microsoft's Visual Studio development environment.

The Computer Science Department at the University of Waikato is also funding a limited number of professional development scholarships for high school teachers to reduce course costs.

COMP103 (NET) Introduction to Computer Science runs from 12 July – 15 October 2010.
