Online Conference Management System
SCSC Group

Requirements   :

Mission   :

We are aiming to provide a software system which manages the conferences. This system is supposed to have these main features:

- login with email - password (holds info about status/details etc)

- hierarchical user base i.e. program chairs -> reviewers/authors

- database of papers/users/reviews/key dates

- all users can submit papers as an author

Introduction:

This document will outlines the initial main aspects required for our conference management system.

1) Program   :
- We will use java 1.6 platforms.

2) Database   :
- Store all user accounts so any user account can be retrieved from the database.

- Store submission papers.

3) User Interface   :
- HTML based:
    -The user interface should be web based interface.
    - The user interface should be simple and easy to use.
 > GUI and sever-client model.

Login system   :
> ~~Any new user must register first before accessing th~~e conference.
   - The user name should be email address
   - The password must at least the length of 6 characters
> The existing user can use his/her own user account to access.
   - If the password was forgotten, the system can email the user his/her password.

Guide Service/Help   :
- This section will explain to the new user some help topics related to the conference use:

- How to start access to conference.

- Paper Submission process

- Roles of Program chair, reviewer etc.
